**NATIONAL'S CASH EARNINGS DOWN 8.7%****NET PROFIT UP 19%****INTERIM DIVIDEND STEADY AT 83 CENTS****FINANCIAL HIGHLIGHTS (March 04/March 03 Comparison)**

- Cash earnings before significant items of \$1.85 billion, down 8.7%
- Net profit after significant items up 19% to \$2.23 billion
- Interim dividend of 83 cents (fully franked).
- Retail banking cash earnings:
  - Australia - up 10.5%
  - New Zealand – steady (up 2.9% in local currency)
  - Europe - down 37.1% (down 27.5% in local currency)
- Corporate & Institutional Banking cash earnings before significant items down 12.8% (down 6.5% excluding currency movements)
- Wealth Management operating profit after tax up 37.3%
- Asset quality sound: gross non-accrual loans to total loans improved from 0.65% to 0.46%
- Return on equity before significant items of 18.8% up from 16.8%.
- Economic Value Added (EVA<sup>®</sup>) down 11.5% to \$978 million\*.
- Total capital at 9.35%, Tier 1 at 7.47% and Adjusted Common Equity ratio of 5.36% after the buy back of 5.5 million ordinary shares.

\*EVA<sup>®</sup> is a registered trademark of Stern Stewart & Co. It measures the economic profit earned in excess of the Group's cost of capital.

---

## CHIEF EXECUTIVE'S REVIEW

"This is a disappointing result but our New Zealand and Wealth Management businesses have made solid contributions.

"Financial Services Australia increased cash earnings although the quality of the result was not ideal with total income up by only 4.8%. Both Financial Services Australia and Corporate and Institutional Banking have not surprisingly been adversely affected by the currency options trading issue.

"We have started to work on and invest in our European businesses to address some of the major issues we have in those markets. Increased competition, compliance costs and adverse currency movements further affected the Financial Services Europe result.

"Under these circumstances we have maintained our dividend payment.

## DIVISIONAL PERFORMANCE

"**Financial Services Australia** increased cash earnings by 10.5%. Strong growth in housing lending was partly offset by a fall in the overall net interest margin. Retail deposits increased by 9.7% since March 2003.

"Agribusiness market share by lending volumes for the year to February increased from 21.7% to 28.9%. Business market share by lending volumes at 26.0% is down from 26.5% for the same period. (Source: Taylor Nelson Sofrais)

"Financial Services Australia has opened 11 integrated financial services centres this half year and is on target to achieve the planned roll out of 42 centres by the end of the financial year. These centres are designed to meet customers' complete financial advice needs.

"**Financial Services Europe** was adversely affected by a combination of higher pension fund expenses and currency movements. The large fall in cash earnings is disappointing but there are several developments underway to address this situation.

"An extensive product renewal program has been completed, including the introduction of a new current account, savings accounts, mortgages, loans and insurance.

"The first four Financial Services Centres have been opened in Liverpool, Bristol, Reading and Southampton and generated £1.2 million in revenue in the half year. A further four centres are planned to open in Oxford, Milton Keynes, Maidstone and Guildford this year.

"**Financial Services New Zealand** increased net interest income by 5.8% in local currency terms based on strong growth in business and personal lending as well as retail deposits.

"Cash earnings were steady reflecting a fall in the net interest margin and a higher charge to provide for doubtful debts.

---

"Highlights of the half year include the launch of the 'Campus Pack' in conjunction with Student Card (a New Zealand student discount scheme) which increased the number of tertiary students banking with Bank of New Zealand by 60%.

"Bank of New Zealand increased home lending since March 2003 by 19% compared to market growth of 16%. Bank of New Zealand was the only bank to increase customer satisfaction according to Auckland University's customer survey for 2003.

**"Corporate & Institutional Banking** has obviously faced a difficult half due to the impact of the foreign currency options trading situation and subsequent events. A higher charge for doubtful debts, adverse currency movements and reduced demand for debt market products, due to a low US interest rate environment, affected cash earnings.

"Despite these challenging circumstances the focus on growing core relationships has continued and this has resulted in the maintenance of a solid base of underlying client income.

"Corporate & Institutional Banking is actively contributing to the program to address the remedial actions required by APRA.

**"Wealth Management** increased operating profit after tax by 37.3% reflecting strong growth in insurance business and the improvement in equity markets which led to growth in earnings from the investments business and investment earnings on capital.

"The strong performance of equity markets from the March 2003 half has resulted in an 11.9% increase in average funds under management with fee revenue higher in all regions.

"Wealth Management continues to be the number one provider of retail investment platforms in Australia with a market share of 18.8% and number two in retail funds under management as at December 2003. (Source: Assirt Market Share Report, December 2003)

Insurance earnings grew by 22.2% and Wealth Management retained the largest share of the total Australian retail life insurance market for both annual in-force premiums and new retail risk annual premiums. (Source: DEXX&R Research Reports, December 2003)

## **OUTLOOK**

"The National is focused on creating strong, sustainable growth in shareholder value."

"As part of our response to the foreign currency options trading losses we are addressing the changes required by APRA as quickly as possible.

"My future priorities are to lead the required cultural change, review our business strategies and our approach to risk management to make sure we have a sustainable platform for future growth. These are the first important steps in a recovery program that will take some time."

# **RESULTS FOR THE HALF YEAR ENDED 31 MARCH 2004**

## FINANCIAL SUMMARY

## REPORTING FORMAT

### Reporting Structure

To assist with the interpretation of the Group's results, earnings have been reported under the following structure:

- Retail Banking, which comprises:
  - Financial Services Australia ('FSA')
  - Financial Services Europe ('FSE')
  - Financial Services New Zealand ('FSNZ');
- Corporate & Institutional Banking ('CIB');
- Other (including Excess Capital, Group Funding & Corporate Centre); and
- Wealth Management ('WM').

### Prior Period Comparatives

From 1 October 2003, there have been transfers of business units from Financial Services Europe to Corporate & Institutional Banking.

Reverse repurchase agreements and repurchase agreements have been reclassified from 'gross loans and advances' and 'deposits and other borrowings' to 'cash and other liquid assets' and 'due from/to financial institutions' respectively, depending on counterparty.

Transferable certificates of deposit have been reclassified from 'deposits and other borrowings' to 'bonds, notes and subordinated debt'.

For comparability, the prior period balances have been reclassified from those included in the Profit Announcement released on 11 November 2003.

The nature of the restatements have been fully disclosed in the release to ASX dated 30 April 2004.

Please refer to the National's website at [www.nabgroup.com](http://www.nabgroup.com) for a copy of this announcement.

### Cash Earnings

Cash earnings is a key performance measure and financial target used by the Group. Dividends paid by the Group are based on after-tax cash earnings (excluding significant items). Cash earnings is a key performance measure used by the investment community, as well as by those Australian peers of the Group with a similar business portfolio.

A reconciliation of cash earnings to net profit appears on page 7. Cash earnings is also explained in detail in the 'Non-GAAP financial measures' section. Refer page 78 for further details.

### Diluted Cash Earnings per Share

Management use growth in diluted cash EPS as a key indicator of performance as this takes full account of the impact of the exchangeable capital units (ExCaps) and provides a consistent basis for year on year comparison moving forward. The potential conversion of ExCaps has a dilutive impact on earnings per share (EPS), which varies from year to year depending on conversion.

Under the terms of the ExCaps the National has the option to require the exchange of all, but not part, of the ExCaps at any time for 7 7/8% convertible non-cumulative preference shares of the National. Holders of the ExCaps or the convertible non-cumulative preference shares have the option to exchange their holding for ordinary shares of the National (or at the National's option, cash) and the National also has the right to redeem, in part or full, under a special offer at any time after 19 March, 2007, with the prior consent of APRA.

A complete reconciliation of the calculation of diluted cash earnings per share appears in note 16. Refer page 75 for further details.

<sup>(1)</sup> Economic Value Added (EVA<sup>®</sup>) is a registered trademark of Stern Stewart & Co. Refer pages 23 and 79 for further details.

<sup>(2)</sup> Cash earnings attributable to ordinary shareholders excludes revaluation profits/(losses) after tax and goodwill amortisation.

<sup>(3)</sup> Includes non-cash items, ie. revaluation profits/(losses) after tax and goodwill amortisation.

<sup>(4)</sup> Total Banking cost to income ratio is before eliminations (refer note 1). Costs include total expenses excluding significant items, goodwill amortisation, the charge to provide for doubtful debts and interest expense. Income includes total revenue excluding significant items and net of interest expense. Refer to 'Non-GAAP financial measures' for a complete discussion of the cost to income ratio on page 79.

**RESULTS FOR THE HALF YEAR ENDED 31 MARCH 2004**

MANAGEMENT DISCUSSION & ANALYSIS

## OVERVIEW <sup>(1)</sup>

### Economic conditions

The recovery in the global economy gathered pace during the half year to March 2004, and appears set to continue during the balance of 2004. Driven by stimulatory policy, the United States grew strongly. There was a pick-up in demand and strong investment in emerging economies (notably China). Japan began to recover and European activity stabilised. Against this backdrop, business conditions in the economies that contain the bulk of the Group's assets – namely Australia, the UK and New Zealand have been relatively favourable.

#### Australia

Reflecting a recovery from possibly Australia's worst drought in 100 years and an improvement in the global economy, Australian activity has picked up significantly since mid 2003. Looking ahead, Australian growth is expected to be quite strong at around 4% in 2004. Exports are expected to continue a gradual recovery, while domestic demand is forecast to moderate significantly. Higher interest rates and reduced wealth gains are expected to see dwelling investment contract moderately and consumption growth soften during 2004. Also underpinning economic forecasts are an easing in business investment growth and ongoing strength in public spending. After reaching a 15 year high in late 2003, we expect credit expansion to moderate to a still solid pace in 2004, reflecting largely an easing in household demand. Subsequent to increasing the cash rate by 50 bps, the Reserve Bank of Australia has kept the cash rate unchanged at 5.25% in early 2004, due to tentative signs of cooling in property markets and the marked strengthening of the \$A to a 7 year high in early 2004. The Group expects the Reserve Bank of Australia to increase the cash rate moderately further during 2004, as the global recovery continues, housing activity cools and the \$A eases.

#### United Kingdom

Economic conditions in the UK economy remain quite favourable. Activity recorded above average growth in the second half of 2003 and most indicators suggest that the economy remained robust in the first three months of 2004, particularly on the domestic side. Manufacturing has emerged from its long, deep recession, supported by the domestic recovery and brighter export prospects. Services remains the main engine of growth for the economy, underpinned by strong consumer spending. Regional growth has converged, with high house price inflation and spending in the north contributing to the reduction in the north-south disparities. The buoyant public sector and booming construction has also helped to smooth the performance of the UK regions. Despite rising interest rates, personal debt continues to expand rapidly and the housing market is robust. Household income growth has also picked up, wealth has risen and unemployment has fallen. Though still strong, the rate of growth in lending to the non-financial corporate sector has eased from its recent highs. Sterling has been rising since the second half of 2003, threatening the emerging recovery in manufacturing. Activity looks set to be sustained during 2004.

#### New Zealand

New Zealand also recorded quite strong activity in the six months to March 2004. The high NZ\$ eroded farm incomes and caused falling prices for traded goods. At the same time, strong consumer spending fuelled by high domestic credit growth, a buoyant construction sector and robust net immigration boosted growth. A boom in house prices, and very low unemployment coupled with solid wage claims, led to strong inflationary pressures in the services industries. While the Reserve Bank of New Zealand raised the cash rate in January to curb these pressures, it subsequently left rates unchanged as signs of a slowing economy and a cooling housing market reduced overall price pressures. Looking ahead, activity is expected to ease during 2004 due to tighter financial conditions and lower immigration.

### Group performance

Whilst economic conditions were reasonable in each of the National's markets, the Group result is disappointing.

The result has been impacted by a number of adverse factors:

- The strength of the Australian dollar has reduced the contribution from offshore operations. This has particularly affected earnings in Australian dollar terms from Financial Services Europe and Corporate & Institutional Banking.
- The loss of \$360 million relating to unauthorised foreign currency options trading. This has had a significant impact on Corporate & Institutional Banking earnings.

<sup>(1)</sup> The discussion on the following two pages relates to results before significant items. For a reconciliation to net profit refer page 7.

Offsetting those factors was a significant net gain on the sale of the National’s shareholdings in St George Bank Limited, and a net loss on the sale of shareholdings in AMP Limited and HHG PLC, and the writeback of provisions relating to SR Investments, Inc. (HomeSide).

Cash earnings after significant items of \$1,977 million for the half year were 2.5% lower than the March 2003 half.

Cash earnings per share decreased 1.6 cents (1.2%) to 131.4 cents. This result included significant items of \$127 million relating to foreign currency options losses, sale of shareholdings and the writeback of provisions relating to HomeSide (refer to page 22 for further details).

Cash earnings before significant items of \$1,850 million decreased 8.7% on the March 2003 half and 9.4% on the September 2003 half. At constant foreign exchange rates cash earnings before significant items decreased 3.7% and 7.6% respectively.

The key features of the result are the continued improvement in the credit quality of the banking book, growth in underlying earnings in both the Australian retail banking and the Wealth Management operations, and a slowdown in growth in New Zealand retail banking. European retail banking results declined significantly. This reflected lower income levels, increased pension fund charges and higher expenses due to the reinvestment program and compliance costs. Corporate & Institutional Banking results were depressed by increased expenses and higher specific provision charges, coupled with flat income levels. Cash earnings per share before significant items decreased 10.1 cents (7.6%) to 122.9 cents.

Diluted cash earnings per share before significant items also decreased 10.2 cents (7.8%) to 119.9 cents, after taking account of the impact of dilutive adjustments, primarily the exchangeable capital units.

**Diluted cash earnings per share before significant items growth (cents)**

The interim dividend has increased by 3 cents to 83 cents per share compared with the prior corresponding period and will be 100% franked.

**Banking**

Total Banking includes Retail Banking, Corporate & Institutional Banking and Other (including Excess Capital, Group Funding & Corporate Centre). It excludes Wealth Management.

Banking operations generated \$1,723 million of total Group cash earnings, a decrease of 12.1% on the prior corresponding period, or 6.6% at constant foreign exchange rates. Income has been flat, while expenses have continued to grow in part reflecting continued investment in the business, compliance-related costs and growth in pension costs. The result includes flat provisioning charges reflecting the continued sound asset quality profile across all regions.

The 2004 efficiency targets established under Positioning for Growth (PfG) are set out below. Financial Services Australia has exceeded its target for the last three halves, but targets for Financial Services Europe and Corporate & Institutional Banking were not achieved.

<b>Cost to income ratio by banking division</b>	<b>2004 Target</b>	<b>Half Year to</b>		
		<b>Mar 04 %</b>	<b>Sep 03 %</b>	<b>Mar 03 %</b>
Financial Services Australia	46.0	<b>45.0</b>	45.8	45.6
Financial Services Europe (excluding pension costs)	48.0	<b>55.1</b>	51.4	48.5
Financial Services Europe (including pension costs)		<b>61.5</b>	54.7	50.9
Financial Services New Zealand	48.0	<b>49.6</b>	49.7	50.8
Corporate & Institutional Banking	36.0	<b>41.4</b>	38.7	38.7
<b>Total Banking (including pension fund expense)</b>		<b>50.9</b>	49.6	47.3

As reported in September 2003, the Group achieved its PfG target of a net reduction in full time equivalent employees of 2,040. In addition, 85% of the original PfG targeted annual cost savings of \$370 million had been delivered. Since that time, there has been expense growth related to new initiatives and an increase in staffing levels to build the business. The National is currently undertaking a strategic review. This review will be completed during the second half and the outcomes advised to the market at that time.

### **Wealth Management**

Wealth Management reported a solid result, with operating profit of \$221 million growing 37% from the March 2003 half and 4% from the September 2003 half. This result was underpinned by the strong performance of both the Insurance business up 22% and the Investments business up 33% (although the Investments business is down 8% on the September 2003 half). Average funds under management and administration (FUMA) grew \$3.6 billion, or 5% over the half year reflecting improved investment returns. In addition, the improved equity market performance contributed to higher earnings on shareholders' retained profits and capital.

The Group continues to invest for future growth, with \$16 million after tax of strategic investment expenditure included within the Wealth Management result.

<b>Wealth Management efficiency targets</b>	<b>2004 Target</b>	<b>Half Year to</b>		
		<b>Mar 04</b>	<b>Sep 03</b>	<b>Mar 03</b>
Cost to premium income ratio (%) <sup>(1)</sup>	21.0	<b>19.0</b>	20.0	21.0
Cost to funds under management (basis points) <sup>(2)</sup>	65	<b>58</b>	60	67

<sup>(1)</sup> Excludes volume-related expenses

<sup>(2)</sup> Excludes the NAFiM investor compensation and enforceable undertakings and volume-related expenses.

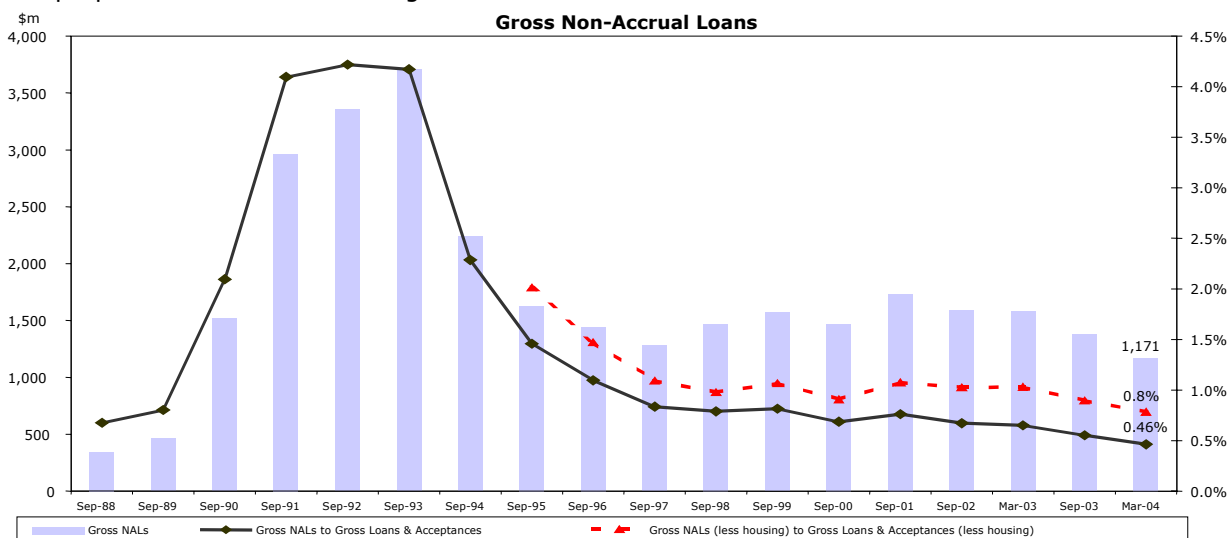

## Asset Quality

The National’s asset quality has remained sound, reflecting the Group’s focus on acquiring and retaining quality business.

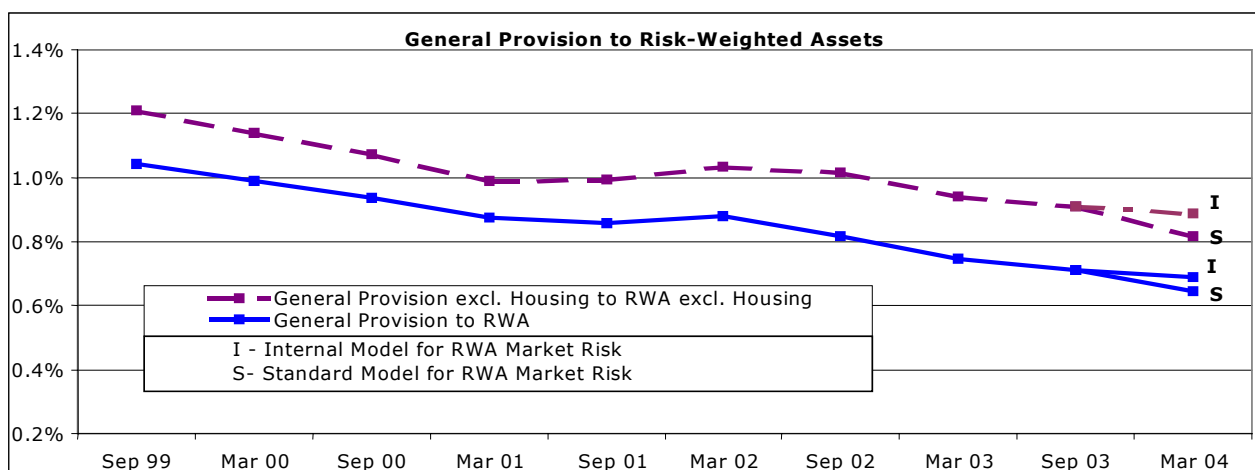

Gross non-accrual loans for the Group decreased from \$1,379 million at 30 September 2003 to \$1,171 million at 31 March 2004. This is an outcome of the current credit environment and the ongoing strategy to exit or return impaired assets to performing loans. The proportion of non-accrual loans to gross loans & acceptances has also reduced as a result of the active management of impaired assets.

Major indicators that demonstrate the strengthening credit quality of the Group’s Balance sheet include:

- Improvement in the security/collateral coverage across the business;
- Favourable movement in the credit ratings across the portfolio; and
- Changes in the Group’s asset composition with an increasing proportion of housing lending and a lower proportion of business lending.

The general provision for doubtful debts represents 0.64% of risk-weighted assets. This is based on the calculation of market risk in line with the Standard model, as required by APRA. If the impact of moving to the Standard Method is excluded, the ratio would have been 0.69%. The general provision is calculated via statistical based methodology, which takes account of risk through consideration of the credit rating of the borrower, term of the facility and level of security held against the facility.

The Group operates a strategic credit framework that is focused on asset quality with the objective to protect, manage and enhance the credit risk profile of the National. This approach involves implementing effective credit risk policies that seek to:

- Promote independent credit reviews at the industry and account level to assess credit quality and determine retention/exit lending strategies;

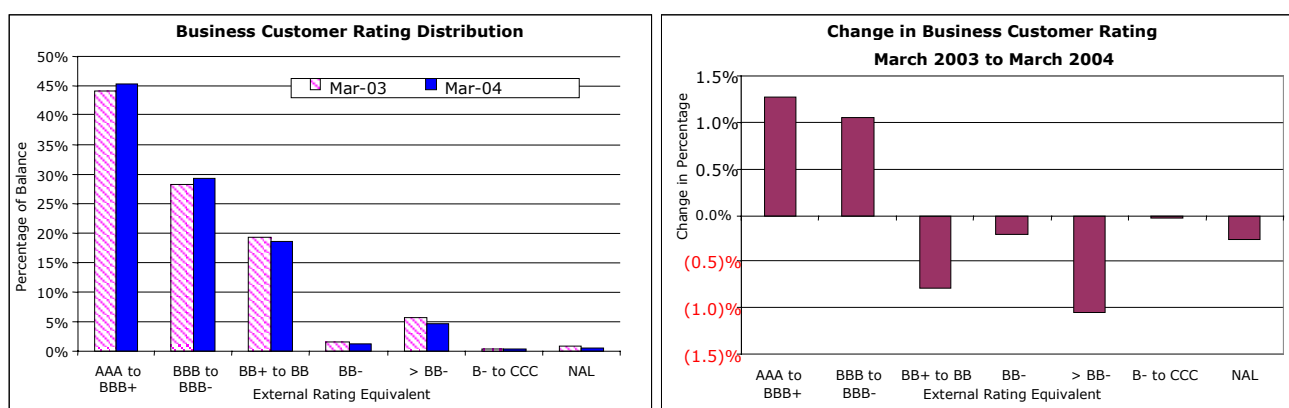

- Identify problem loans and exposures exhibiting signs of weakening credit quality via early warning indicators and the use of behavioural scoring tools;
- Manage a limit violation framework covering industry, single large exposure and counterparty limits;
- Diversify the portfolio by geography and sector using portfolio monitoring tools; and
- Align business strategy with capital management by achieving appropriate pricing for risk, facility structures aligned to customers needs and ensuring customers are appropriately rated.

### Business Portfolio

The global Business Portfolio consists of customers serviced by Retail Banking (Business) and Corporate & Institutional Banking.

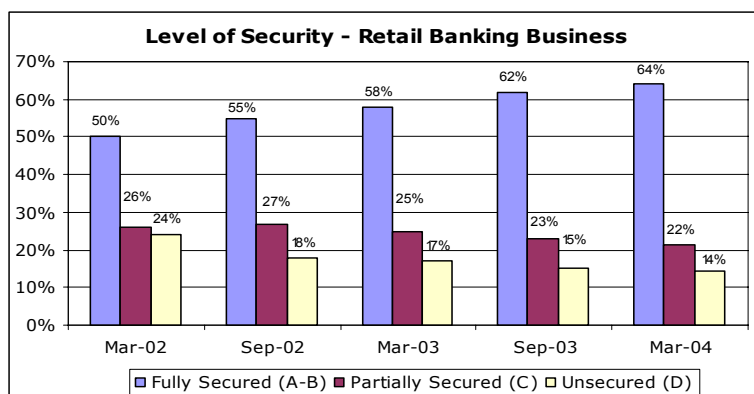

The current state of the global economy has created a more favourable credit environment. The Group has actively sought to attract new business and retain existing business that is of investment grade quality.

The changes in the distribution of the business customer ratings, over the 12 months to March 2004, support the trend that the credit quality of the portfolio has improved. The proportion that is equivalent to investment grade AAA to BBB- has increased by 2.3% whereas speculative (BB+ to CCC) and impaired grade both fell.

### Retail Banking (Business)

The focus on credit quality includes growing the percentage of the lending book that is fully-secured by assets. Over the past twelve months, Retail Banking (Business) has increased its proportion of fully-secured lending from 58% to 64% of the portfolio. The partially secured and unsecured sectors both decreased.

#### Business lending categories:

Category A - Bank security > 142% of the facility

Category B - Bank security between 100% to 142% of the facility

Category C - Bank security between 50% to 100% of the facility

Category D - Bank security of < 50% of the facility

### Corporate & Institutional Banking

The majority of the portfolio for Corporate & Institutional Banking is partially secured or unsecured, however 92% of the portfolio is investment grade, up from 91% at September 2003 and 88% in September 2002.

### Business Industry Exposures

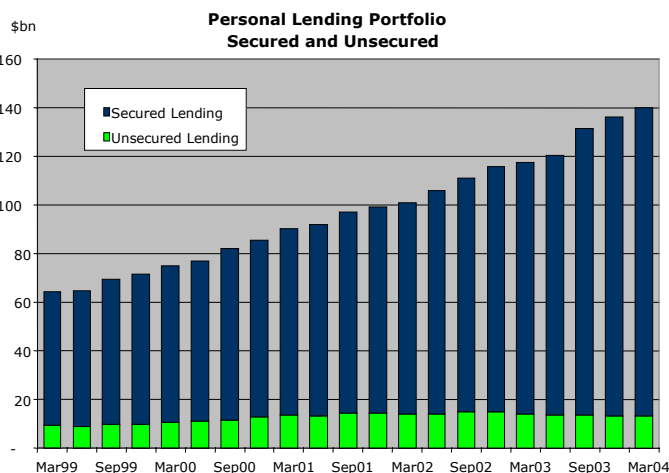

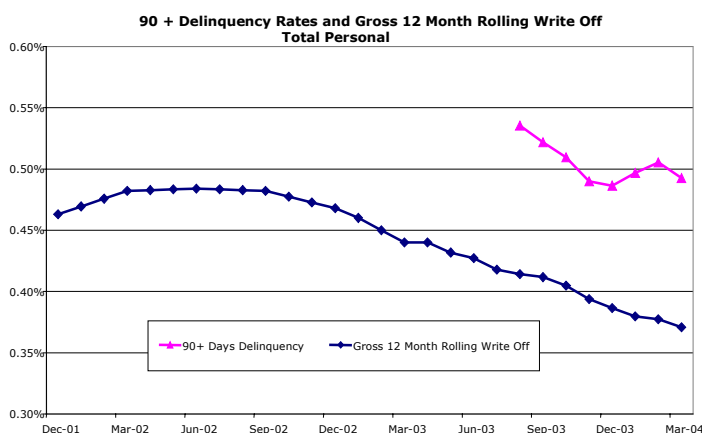

The Group conducts industry reviews on a regular basis to manage its exposure to sectors and to implement strategies to manage designated higher risk industries by way of assessing viability and collateral involved. Industry reviews are also used to identify growth opportunities.

Select Industry Exposures

	As at March 04			
	Exposures \$bn	% of total Group Exposures	Investment Grade \$bn	Non-accrual \$bn
Airlines	1.79	0.40	0.93	0.03
Construction – Residential	3.26	0.74	2.28	0.01
Construction – Non Residential	2.28	0.52	1.78	-
Energy & Utilities	6.88	1.56	5.55	0.27
Telecommunications	2.17	0.49	1.70	0.06

Consumer Portfolio

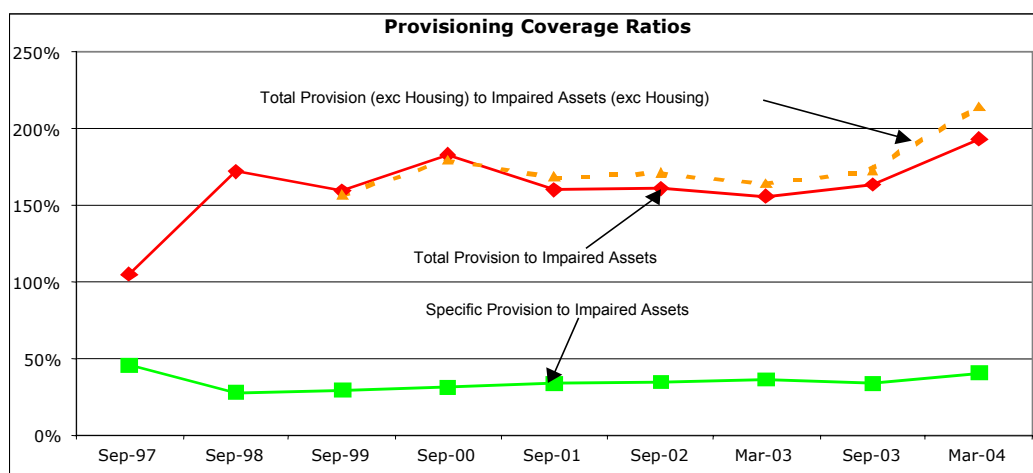

The consumer portfolio consists of home loans, credit cards, personal loans and other products marketed to retail customers. The asset quality of the consumer portfolio remains sound, as illustrated by the improving trend in the following two charts below.

The rolling write off rate is a measure of consumer loans written off, whereas the 90+ delinquency is a measure of consumer loans whose payments are in arrears by more than 90 days.

Provisioning Coverage – all sectors

The specific provision to gross impaired assets ratio has improved from 33.5% at 30 September 2003 to 41% at 31 March 2004. Similarly total provision to gross impaired assets has improved from 163% to 193% over the same period.

## PROFITABILITY

### Net Operating Income

Group net operating income increased 3.8% from the March 2003 half. Banking other operating income decreased by 0.7%, but increased at constant foreign exchange rates by 4.4% benefiting primarily from continued housing lending growth.

Banking net interest income fell 4.7%, but increased 1.4% at constant foreign exchange rates from the March 2003 half reflecting solid loan growth, partly offset by continued pressure on margins and a fall in Corporate & Institutional Banking's Markets division net interest income.

Net interest income grew solidly within the Australian and New Zealand retail banking operations, with net interest income growth of 5.2% in Australia and 5.8% in New Zealand at constant foreign exchange rates.

### Net Interest Income

#### Volumes by Division

	Half Year to			Fav/ (unfav) Change on Sep 03	
	Mar 04 \$bn	Sep 03 \$bn	Mar 03 \$bn	%	Ex FX % <sup>(2)</sup>
<b>Average interest-earning assets <sup>(1)</sup></b>					
Financial Services Australia	122.1	115.0	106.8	6.2	6.2
Financial Services Europe	46.2	46.9	50.3	(1.5)	2.4
Financial Services New Zealand	22.2	21.1	20.2	5.2	6.5
Retail Banking	190.5	183.0	177.3	4.1	5.3
Corporate & Institutional Banking	102.3	104.4	110.4	(2.0)	1.5
Other	6.4	5.4	6.2	18.5	18.9
<b>Group average interest-earning assets</b>	<b>299.2</b>	<b>292.8</b>	<b>293.9</b>	<b>2.2</b>	<b>4.1</b>

<sup>(1)</sup> Interest-earning assets exclude intercompany balances.

<sup>(2)</sup> Change expressed at constant foreign exchange rates.

### Net interest margin

Group net interest margin declined 10 basis points from the September 2003 half of 2.50% to 2.40%.

Margin decline occurred in:

- Retail Banking, primarily due to the mix effect of the strong growth in mortgages and in lower margin fixed rate lending; and
- Corporate & Institutional Banking, primarily due to a reduction in contribution from Money Markets.

Within Retail Banking the 8 basis point decline in contribution to the Group margin is due to a decline in margin across all regions - Australia, Europe and New Zealand.

The decline in Financial Services Australia’s margin of 20 basis points is due to the:

- continued growth in home loans and an increase in lower margin fixed rate lending;
- unfavourable deposit mix due to growth in lower margin products, primarily non-carded time deposits, business investment accounts and cash management accelerator accounts;
- reduced contribution from free funds, due to fall in the 3 year moving average of swap rate from 5.63% during September 2003 half to 5.30% in March 2004 half; and
- the prevailing interest rate environment of anticipated cash rate rises resulting in an unfavourable basis risk position.

The decline in Financial Services Europe’s margin of 13 basis points is due to the impact of growth in lower margin fixed rate mortgage lending and a reduction in personal loan volumes.

The decline in Financial Services New Zealand’s margin of 9 basis points also reflects growth in lower margin fixed rate mortgage lending, as well as a reduction in retail deposit margins following a decline in cash rates during the second half of 2003.

## Net Life Insurance Income

The Group reports its results in accordance with Australian Accounting Standard AASB 1038 “Life Insurance Business” (AASB 1038). AASB 1038 requires that the interests of policyholders in the statutory funds of the life insurance business be reported in the consolidated results.

Net life insurance income is the profit before tax excluding net interest income of the life insurance statutory funds of the life insurance companies of the Group. As the tax expense/benefit is attributable primarily to the policyholders, the movement in net life insurance income should be viewed on an after tax basis. The life insurance funds of the life insurance companies conduct superannuation, investment and insurance-related businesses (ie. Protection business including Term & Accident, Critical Illness and Disability insurance and Traditional Whole of Life and Endowment).

	Half Year to			Fav/ (unfav) change on	
	Mar 04 \$m	Sep 03 \$m	Mar 03 \$m	Sep 03 %	Mar 03 %
Net life insurance income	455	363	81	25.3	large
Income tax (expense)/benefit	(213)	(196)	70	(8.7)	large
<b>Net life insurance income after tax</b>	<b>242</b>	<b>167</b>	<b>151</b>	<b>44.9</b>	<b>60.3</b>

Net life insurance income after tax has improved 60% on the March 2003 half. This is primarily due to increased investment revenue reflecting the performance of global equity markets as compared to the March 2003 half, partially offset by an increase in policy liabilities.

For detailed discussion on the results of Wealth Management, including the results of the life businesses (above), as well as the results from non-life businesses, refer pages 38 – 42.

## Other Operating Income

### Movement on March 2003 half

Total Banking other operating income decreased by 0.7% from the prior comparative period to \$2,110 million. At constant foreign exchange rates, other operating income increased 4.4%, reflecting:

- growth in loan fees from banking on the back of continued strong growth in mortgages and higher transaction volumes in Australia, offsetting pressures in Europe and New Zealand;
- growth in loan fees relating to new Specialised Finance deals;
- higher trading income relating to Money Markets and Debt Markets due to a switch from low-yielding physical assets to derivative-type instruments and the close-out of hedge swaps in the UK;
- growth in the Fleet Management and custody businesses following recent acquisitions;
- flat money transfer fees; and
- a fall in fees and commissions income primarily due to the impact of the RBA interchange reform in Australia and lower levels of activity in Europe.

### Movement on September 2003 half

Total Banking other operating income decreased by 7.0% from the September 2003 half. At constant foreign exchange rates, other operating income decreased 5.5%, due to:

- a reduction in money transfer fees;
- the inclusion in the September 2003 half of a one off benefit on the restructure of the hedging swaps on the TrUEPrS<sup>SM</sup> preference shares and profit on sale of property;
- flat loan fees from banking, with growth in Australia being offset by pressures in Europe and New Zealand; and
- offset by an increase in trading income.

Wealth Management other operating income increased by 12.6% from the prior comparative period, and 12.3% from the September 2003 half, resulting from improved investor sentiment, with stronger equity markets increasing fee income in the investments business.

## Operating Expenses

Total Banking expenses increased 4.2%, or 10.5% at constant foreign exchange rates, from the prior comparative period to \$2,866 million.

The result has been impacted by:

- increased costs associated with the European defined benefit pension funds - pension charges of £44 million were incurred in March 2004 half (September 2003 half: £24 million, March 2003 half: £18 million), of which £39 million (September 2003 half: £21 million, March 2003 half: £15 million) relates to Financial Services Europe and the balance to other businesses; and
- a superannuation contribution holiday in Australia reduced pension fund expenses by \$14 million in the March 2004 half (primarily in Financial Services Australia).

### Movement on March 2003 half

Total Banking expenses (excluding pension fund expenses) increased 2.8%, or 8.8% at constant foreign exchange rates, from the March 2003 half, reflecting:

- higher occupancy costs as a result of annual rent increases and relocation costs;
- growth in costs associated with major Group-wide projects - Basel II, IFRS and ISI;
- higher software amortisation across the business reflecting prior period investment in infrastructure;
- \$22 million (after tax) write off of development work associated with the Integrated Systems Implementation (ISI) program;
- higher compliance-related and regulatory costs in Europe; and
- a small increase in personnel costs (excluding pensions) as salary increases offset productivity improvements.

### Movement on September 2003 half

Total Banking expenses (excluding pension fund expenses) decreased 2.6%, or 0.8% at constant foreign exchange rates, from the September 2003 half, primarily resulting from:

- the September 2003 half included expenses associated with corporate structure, funding and acquisition-related initiatives;
- the impact of the EMU write-off in the September 2003 half; and
- lower expenses associated with regulatory compliance.

Wealth Management operating expenses increased 10.7% from the prior comparative period and 5.8% from the September 2003 half to \$436 million.

## Income Tax Expense

Total Banking's effective tax rate on cash earnings before significant items has increased from 28.5% in the prior comparative period to 29.7%. This is impacted by structured finance transactions, to which a wide range of tax rates are applied. Further, the March 2004 half has been impacted by the decision not to book the tax benefit on the interest expense relating to Excaps following the receipt of an ATO tax assessment.

A reconciliation of the total Group income tax expense is incorporated in note 12.

## Significant Items

### ***Foreign currency options losses***

In January 2004, the National announced that it had identified losses relating to unauthorised trading in foreign currency options of \$360 million before tax, or \$252 million after tax. This total loss consists of losses arising from the removal of fictitious trades from the foreign currency options portfolio of \$185 million and a further loss of \$175 million arising from a risk evaluation and complete mark-to-market revaluation of the foreign currency options portfolio in January 2004.

Further details of this matter may be obtained from the Company's ASX Announcement on 12 March 2004, which is available on the Group's website at [www.nabgroup.com](http://www.nabgroup.com). The complete PricewaterhouseCoopers and APRA reports relating to the trading losses are also available on the Group's website.

### ***Sale of strategic shareholdings***

On 28 January 2004, the National sold its strategic shareholdings in St George Bank Limited, AMP Limited and HHG Plc. This resulted in a net profit on sale of \$315 million after tax, which has been recognised in the March 2004 half.

### ***Writeback of HomeSide provision***

During the half year to March 2004 the Group wrote back to profit a provision \$64 million. This provision was raised at the date of sale of SR Investments, Inc (the parent entity of HomeSide), in relation to estimated probable costs arising from the sale. At this time the expense was treated as a significant item.

*Details of significant items are set out at note 13 on page 70.*

<sup>(2)</sup> Other equity instruments are National Income Securities, Trust Preferred Securities, preference share capital and outside equity interest.

<sup>(3)</sup> These comparatives have changed from those reported in the Full Year Results Announcement September 2003, due to revisions to the calculation methodology.

EVA® is a measure designed to recognise the shareholder requirement to generate a satisfactory return on the economic capital invested in the business. If the business produces profit in excess of its cost of capital then value is being created for shareholders.

EVA® is used to measure and evaluate the performance of the National's different operating divisions and is an integral component in product pricing, assessing investment opportunities and the allocation of resources. Equity is allocated to each business using a risk-adjusted methodology for each division's credit, market and operational risk.

In conjunction with Stern Stewart, the Group has simplified the EVA® calculation methodology to align it more closely to cash earnings and ordinary shareholders funds.

EVA®'s net operating profit after tax (NOPAT) is based on cash earnings before significant items (using 30% projected tax rate) plus the calculated benefit of imputation credits earned by paying Australian tax. Capital charge is based on the Group's cost of capital (11.5% per annum) and is applied to a calculated economic capital that is based on average shareholders equity.

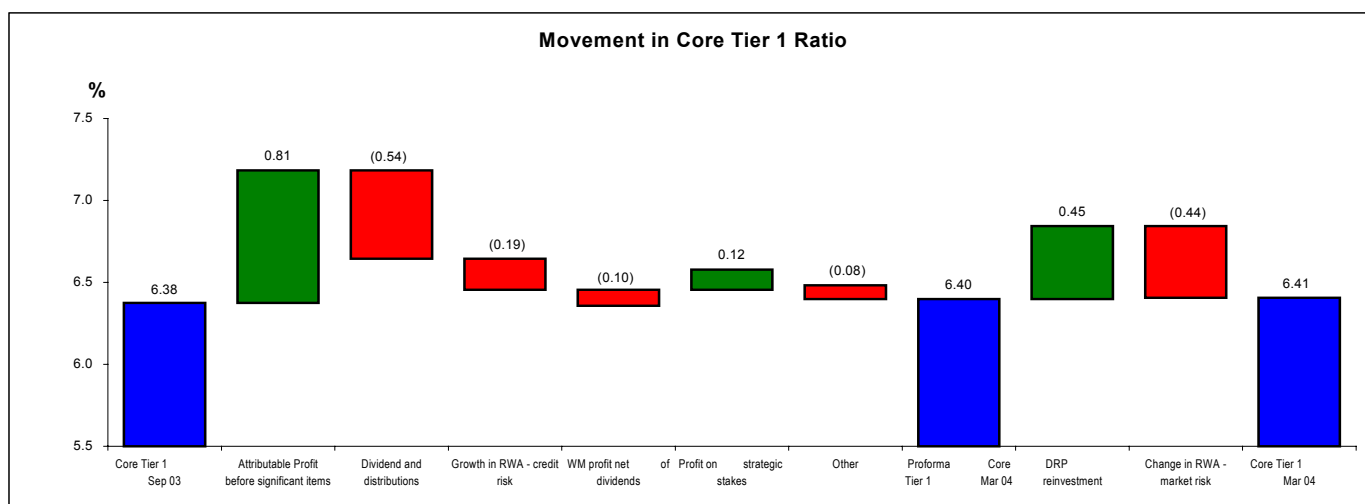

The EVA® result for the March 2004 half year has declined by 11.5% and 15.2% on the March 2003 and September 2003 half years, respectively. This reflects the impact of the fall in cash earnings, with the capital charge remaining flat compared to the previous periods.

*EVA® is a registered trademark of Stern Stewart & Co.*

## Capital Position

Regulatory capital ratios are set out below.

	Target ratio %	As at		
		Mar 04 %	Sep 03 %	Mar 03 %
Core Tier 1 (excluding hybrid equity)	6.0 – 6.5	6.41	6.38	6.42
Tier 1	7.0 – 7.5	7.47	7.82	7.47
<b>Total Capital</b>	<b>10.0 -10.5</b>	<b>9.35</b>	<b>9.70</b>	<b>9.16</b>

The APRA report into irregular currency options trading at the National (dated 24 March 2004) requires the National's internal target for total capital to rise to 10.00% of risk-weighted assets. Previously the Group's target total capital ratio was 9.00% to 9.50%. The increased target ratio for total capital is expected to be achieved through a combination of underwriting of the Group's dividend reinvestment plan and Tier 2 subordinated debt issuance.

The calculation to determine the market risk capital component of risk-weighted assets at 31 March 2004 was carried out on a best estimate basis under the Standard Method as directed by APRA. The difference of \$17,875 million in risk-weighted assets between the Standard Method calculation (\$21,750 million) and the Internal Model Method (\$3,875 million) that was used for prior period calculations, reflects the following:

- The Standard Method, as prescribed by the APRA Prudential Standard (APS 113), limits recognition of portfolio effects on outstanding positions and is substantially more restrictive on the rules regarding the matching of positions; and
- The limited time frame to implement the Standard Method impacting the ability to explore all position offsetting opportunities permitted by APS 113.

In addition to regulatory capital ratios, the National uses the ratio of adjusted common equity to risk-weighted assets (the ACE ratio) as a key capital target. It measures the capital available to support the banking operations, after deducting the Group's investment in wealth management operations. The Group's target range for the ACE ratio is 4.75% to 5.25%. As at 31 March 2004, the ACE ratio was 5.36%, an increase from 4.95% at 30 September 2003. Refer to note 15 regarding the components of the ACE ratio.

### Redemption of Tier 1 preference shares

On January 22, 2004 the National bought back 36,008,000 fully paid non-converting non-cumulative preference shares of the Company that were issued in connection with the issue of 18,004,000 Trust Units Exchangeable for Preference Shares™ (TrUEPrS<sup>SM</sup>) in 1998. TrUEPrS were redeemed on the same day. The financial effects of the buy-back, redemption and dissolution of the capital raising structure recognised in the March 2004 half include a reduction in contributed equity of \$730 million, a reduction in cash of \$582 million and a net increase in retained profits and reserves of \$148 million.

### Share Buy-back Program

In October 2003 the Group announced its intention to repurchase approximately 25.5 million shares over the year to 30 September 2004. However, in March 2004 the National announced that it was terminating the share buy-back program. During the half year, the National bought back 5.5 million shares at an average price of \$29.58, thereby reducing ordinary equity by \$162 million. The highest price paid was \$30.22 and the lowest price paid was \$28.70.

## TOTAL BANKING

Total Banking includes Retail Banking, Corporate & Institutional Banking and Other (including Excess Capital, Group Funding and Corporate Centre). It excludes Wealth Management.

## RETAIL BANKING

The regional Retail Banking Divisions include the business, agribusiness and consumer financial services retailers, as well as cards, payments and leasing units together with supporting Customer Service and Operations. These operate in Australia, Europe and New Zealand. They exclude Wealth Management, Corporate & Institutional Banking and Other (including Excess Capital, Group Funding & Corporate Centre). The regional Retail Banking businesses aim to develop long-term relationships with their customers by providing products and services that consistently meet the full financial needs of customers.

### Financial performance

Cash earnings increased 10.5% over the prior corresponding period and 3.3% on the September 2003 half, reflecting a lower charge to provide for doubtful debts (primarily due to a single large exposure in the prior periods) and strong growth in housing lending.

Underlying profit increased 6.1% compared with the March 2003 half and is in line with the September 2003 half. The cost to income ratio improved on the two previous half years and for the March 2004 half year was 45.0%.

- Net interest income grew 5.2%, reflecting strong growth in housing lending and deposit volumes, as well as the impact of a reduction in the net interest margin. Housing lending grew 17.1% from March 2003, (18.0% including investment housing). The net interest margin has reduced 27 bps, largely due to continued stronger growth in housing lending, coupled with a higher proportion of growth in fixed rate lending.
- Net interest income fell 0.6% when compared to the September 2003 half, largely due to a less favourable interest rate environment arising from market anticipation of a cash rate rise.
- Retail deposits grew 9.7% from March 2003, reflecting a strong sales and pricing focus. A large proportion of the growth was in term deposit and demand deposit accounts, which attract lower margins.
- Other operating income increased 4.1% as a result of business transaction and fee repricing in May 2003, growth in bill acceptances (up 9.4% since March 2003), and recovery of occupancy costs through internal income from Wealth Management of \$17 million. The implementation of RBA designated credit card interchange margins from 31 October 2003 unfavourably impacted income by \$20 million.
- The flat result compared to September 2003, is primarily due to the impact of profit on sale of property recorded in the prior half year and the RBA interchange impact.
- Total operating expenses have grown by 3.3% over the prior corresponding period.
  - Personnel expenses were 3.1% lower including the impact of a superannuation contribution holiday of \$14 million and an FBT overprovision writeback of \$7 million. Implementation of productivity initiatives during 2003 has enabled salary increases from the Enterprise Bargaining Agreement of 4.5% from 1 January 2004 to be absorbed.
  - Occupancy expenses have increased 18%. This increase includes the consolidation of all Australian-based property costs to Financial Services Australia (offset in internal income) and the impact of annual rent reviews.
  - Technology costs have increased 12%, including higher software amortisation on the completion of projects and the sale and leaseback of voice and data equipment (moving from a 10 year depreciation cycle to a 3 year lease).
  - Fleet maintenance costs increased \$7 million, reflecting growth in the business.
- Total expenses reduced 2.6% compared with the September 2003 half mostly due to lower personnel costs. Staff numbers have increased by 430 since 30 September 2003 including a graduate intake, temporary staff to support the transition to automated business lending processes and additional frontline and support staff in Business Financial Services.

Asset quality has further improved this half. The result for the prior two halves was impacted by one large account with a provision of \$46 million in March 2003 and \$58 million in September 2003. The continued program to improve credit quality and capital efficiency has resulted in a 23 basis point reduction in gross non-accrual loans as a percentage of gross loans and acceptances to 0.29%.

### Key developments

- Market share in Agribusiness lending increased strongly in the 12 months to February 2004, up from 21.7% to 28.9%. Business lending leading market share has reduced from 26.5% to 26.0% for the same period (source: Taylor Nelson Sofrais).
- Deployment of new integrated financial services centres (IFSC's) continues, with 11 launched this half year and on target to achieve the planned rollout of 42 IFSCs by the end of the financial year. At IFSCs customers have access to a broad range of National financial services specialists, enabling the National to provide a one-stop-shop for customers' financial advice needs.
- In December 2003 the National was announced as the gold winner of the National Centre for Database Marketing (NCDM) Database Excellence Awards. Winning this award demonstrates the commitment to developing processes that support the customer relationship management strategy for the organisation. In the last financial year over 1 million targeted customer contacts were generated through National Leads.

- Roll-out of National Leads to all Agribusiness and National Financial Planners is complete. National Leads is an automated program that facilitates identification and fulfilment of customer sales opportunities within the existing customer base. All Relationship Managers and National Financial Planners are provided with a small number of highly targeted leads each week enabling them to make proactive contact with customers, thereby increasing share of wallet and customer loyalty.
- Rollout of eBL (electronic Business Lending) within Business and Agribusiness segment is underway and will be complete by September 2004. This automated lending process reduces turnaround times for Business and Agribusiness customer lending and delivers processing efficiencies.

<b>Full-time equivalent employees (FTE)</b>	<b>11,661</b>	11,411	11,551

**Financial performance (in local currency)**

Cash earnings decreased 27.5% on the prior corresponding period and 20.4% on the September 2003 half. Higher pension fund expenses have negatively impacted this result. If this impact is excluded, cash earnings decreased 17.5% on the March 2003 half and 11.9% on September 2003 half.

Including pension fund expenses, underlying profit is down 23.3% on the March 2003 half.

- FSE lending has increased 4.9% over the last 12 months and 2.7% on September 2003:
  - An increased focus on mortgage lending has resulted in growth of mortgage volumes of 11.9% over the last 12 months;
  - Business lending has increased by 7.1% over the last 12 months.
- Retail deposits have grown 1.8%, with non-interest bearing deposits growing by 7.9%.
- Net interest margin has decreased from 4.31% in the March 2003 half to 4.16%. This contraction has offset volume growth, reflecting the shift in product mix towards lower margin lending products.
- Other operating income has decreased 4.4% compared to the prior corresponding period, resulting from reduced transaction fees with lower levels of activity, and lower lending fee income from lower volumes of business commitment fees.

- Operating expenses, excluding pension expenses, increased 11.3% driven by:
  - additional provisions for retiree medical expenses, endowment mis-selling and regulatory costs of £14 million;
  - £4 million of spend in relation to Integrated Financial Solutions centres, including personnel costs from the uplift in the number of customer-facing staff to support the growth strategy in the South of England;
  - £4.5 million of increased investment expenditure including investments in the Customer Connect System, involving replacement of the front-end systems and expenditure on integration;
  - on-going expenditure on regulatory projects, such as compliance costs for Chip & Pin technology (mandatory European project to reduce card fraud), Basel II, IFRS and the Financial Services Authority mortgage regulation program;
  - growth in advertising costs in relation to branding and communication-related expenses; and
  - growth in insurance costs.

The charge to provide for doubtful debts decreased 12.5% on the prior corresponding period and 8.7% on the September 2003 half. During the year, asset quality within the lending book has continued to improve with higher recovery rates and lower gross write-offs. The changing portfolio mix towards lower risk products has contributed towards this favourable outcome.

### Key developments

- The launch of a brand awareness program highlighting the Group's growing investment in its UK and Irish franchises. Early indicators of success include an improvement in Clydesdale Bank Business segment market share indicating that improvements in customer loyalty and satisfaction scores have begun to feed through to sales.
- A major program aimed at delivering improved financial products and services to all customers. Program deliverables to date include:
  - The launch of Integrated Financial Solutions centres. This commenced with the first four centres opening in Liverpool, Bristol, Reading & Southampton generating £1.2 million in revenue. The next phase will see four further centres in Oxford, Milton Keynes (opening May), Maidstone and Guildford (opening June/July) with further centres planned by September;
  - The first phase of Customer Connect System was successfully implemented to more than 30 Yorkshire Bank outlets. System enhancements that enable improved customer service and sales opportunities will be introduced in the last quarter of 2004; and
  - The launch of new product packages which offer "offset" mortgages, the current account plus and new Business and Farm investment loans. These packages are more competitive and provide customers with more features. The initial response to these new offers has been positive.

### Financial performance (in local currency)

Cash earnings increased 2.9% over the prior corresponding period (4.7% over the September half). Strong growth in lending and retail deposits, productivity improvements and sound asset quality were features of the result.

Underlying profit grew 6.0% on the March 2003 half.

- Net interest income grew by 5.8% over the March 2003 half (4.9% over the September half) reflecting strong volume growth in business and personal lending and retail deposits.
- In 2003, BNZ ceased selling mortgages via the mortgage broker channel in New Zealand and over that period it has increased market share in that segment (*source: RBNZ*). Also BNZ was the only bank to increase customer satisfaction from 57% to 71% according to Auckland University's customer survey (2003) which underlines the success of the strategy.
- Housing volumes grew 18.7% (compared to systems growth of 16.0%), reflecting the continued popularity of BNZ products. BNZ has a number of unique products in the market which are proving to be very popular such as 'FlyBuys' which offer loyalty points on home loans.
- Cash rates in New Zealand fell 50bps from the corresponding March half and with interest rates at historical lows, product mix has changed as customers move to fixed rate products in order to 'lock-in' lower rates. This has put further pressure on the net interest margin. The decline in cash rates has also put downward pressure on retail deposits margins.
- Other operating income is flat on the prior periods. Growth as a result of higher volumes and transaction levels has been offset by a trend for customers to modify their activity to minimise fees.
- Other operating expenses have increased by 1.1% over the prior corresponding period. Continued efficiency gains have however resulted in the cost to income ratio improving from 50.8% to 49.6%.
  - Underlying increase in personnel expenses has been due to renegotiated standard terms of employment. Non-personnel expenses growth has remained relatively flat. Increases in occupancy costs have been offset by productivity improvements.
  - The increase in expenses from the September half is due to timing of advertising initiatives and personnel costs.

Gross non-accrual loans to gross loans and acceptances remains low at 0.15% which reflects the continued focus on maintaining credit quality. Total specific provisions to gross impaired assets have increased to 59.5% in the March 2004 half reflecting a higher level of specific provisioning coverage in Business. Gross impaired assets have increased slightly to \$39 million.

### Key developments

- Customer registrations for Internet Banking are at 175,000 at the end of February 2004, which represents an increase of 51,000 (41%) over the same time last year.
- Work is continuing on initiatives to improve customer service with a pilot underway for a new tellers' customer service platform, which will allow faster and more extensive service for customers in branches. BNZ are also making branch manager appointments to our network, reintroducing a role that has not existed for several years. Under the appointments, branch managers will be responsible for all aspects of service and sales delivery in branches. The public response to this initiative has been overwhelmingly positive.
- Tertiary students have been targeted with a new package called 'Campus pack'. Historically BNZ has been underweight in its natural share in the youth market. Response from students has been strong with the number of tertiary students banking increasing by 60%.

## CORPORATE & INSTITUTIONAL BANKING

Corporate & Institutional Banking (CIB) is responsible for managing the Group's relationships with large corporate clients and financial institutions worldwide. CIB operates through an international network of offices in Australia, Europe, New Zealand, North America and Asia.

CIB comprises Corporate Banking, Markets, Specialised Finance, Financial Institutions Group, Transactional Solutions and a Support Services unit. The business also incorporates Custodian Services, which provides custody and related services to institutions within the Australian, NZ and UK markets.

	As at		
	Mar 04	Sep 03	Mar 03
<b>Asset quality</b>			
Gross non-accrual loans (\$m)	<b>456</b>	539	427
Gross loans and acceptances (\$bn) <sup>(4)</sup>	<b>43.0</b>	44.5	45.4
Gross non-accrual loans to gross loans and acceptances	<b>1.06%</b>	1.21%	0.94%
Specific provision to gross impaired assets	<b>45.0%</b>	36.1%	43.3%
<b>Full-time equivalent employees (FTE)</b>	<b>2,720</b>	2,624	2,549

<sup>(4)</sup> Comparative balances for gross loans and acceptances have been restated to reflect the reclassification of reverse repurchase agreements from 'gross loans and advances' to 'cash and liquid assets' and 'due from other financial institutions'. Gross loans and acceptances now equate to core lending and acceptances as disclosed at September 2003.

### Financial performance

Cash earnings before significant items of \$375 million decreased 12.8% on the March 2003 half year and is 16.1% lower than the September 2003 half. This excludes losses announced in January 2004 related to unauthorised trading in foreign currency options of \$360 million pre-tax (\$252 million after tax) which have been classified as a significant item.

- Approximately 50% of Corporate & Institutional Banking's cash earnings before significant items are generated from offshore markets. Comparative performance has been adversely affected by the strong appreciation in the Australian dollar, particularly in comparison to the March 2003 half year. At constant exchange rates cash earnings decreased by 6.5% on the March 2003 half year.
- Total income for the half year decreased 0.1% on the March half 2003, however increased 7.5% at constant exchange rates. In comparison to the September 2003 half year revenue has been relatively flat at constant exchange rates. The split of net interest income and other operating income can vary considerably depending on market activity and economic conditions. Net interest income decreased 18.6% on the March half and 5.4% on the September half, largely due to a reduction in Money Markets income, a change in mix of Structured Finance transactions and lower interest on capital deployed. Other operating income grew 16.4% on the March 2003 half with improved client fee income streams and strong Specialised Finance performance.
- The focus on growing core relationships has continued, and this has resulted in the maintenance of a solid base in underlying client income. Client-based income grew 11.5% in comparison to the March 2003 half year and 0.9% on September 2003 half year at constant exchange rates. Client income in the current half year has been adversely impacted by reduced demand for debt market products due to the low US interest rate environment and an increase in clients accessing global capital markets for funding.
- The reduction in margin from the March 2003 half to the September 2003 half is primarily due to product mix, with a reduction in contribution from money markets and growth in securities under reverse repurchase agreements. Net interest margin has remained relatively stable from September 2003 half.
- Expenses have increased 6.7%, or 16.3% at constant exchange rates on the prior corresponding period. This is the result of growth in personnel costs reflecting annual salary reviews, higher staff numbers and redundancy provisions, growth in occupancy costs and transaction-related expenses, and higher software amortisation charges. This increase reflects initiatives to support the growth in client income.
- The charge to provide for doubtful debts has doubled on the September half as a result of increased specific provision charges.
- Asset quality has continued to improve, with the level of exposures rated investment grade or above increasing from 91.4% at September 2003 to 92.3% as at March 2004. The level of gross non-accrual loans to gross loans and acceptances has reduced from 1.21% at September 2003 to 1.06% at March 2004 with the level of specific provision coverage on impaired assets increasing by 8.9 percentage points to 45.0% at March 2004.

**Key developments**

- A program is in place to address the issues arising from the APRA and PwC reports into the unauthorised currency options trading loss.
- Awarded the following in the INSTO Annual Distinction Awards, December 2003:
  - Project Finance House of the Year
  - Project Finance Deal of the Year
  - Vanilla Bond House of the Year
  - Cash Management House of the Year

## WEALTH MANAGEMENT

Wealth Management operates a diverse portfolio of financial services businesses. It provides financial planning, insurance, private banking, superannuation and investment solutions to both retail and corporate customers and portfolio implementation systems and infrastructure services to financial advisers. The businesses operate across four regions, Australia, Europe (Great Britain & Ireland), New Zealand and Asia.

## Financial performance

Net profit (after outside equity interest) for the March 2004 half year was \$369 million, comprising \$221 million of profit generated through operations and \$148 million of revaluation profit. Operating profit after tax grew 37.3% on the March 2003 half reflecting the impact of the continued strong growth in the Insurance business and the impact of the improvement in equity markets on the Investments business and shareholders retained profit and capital.

The business continued to invest, incurring a \$16 million after tax profit impact from investment expenditure to fund strategic investment programs in both Australia and the UK, and continued the divestment of non-core operations identified as part of a detailed portfolio review.

## Investments

Investments profit from operations increased by \$19 million, or 32.8% on the March 2003 half. The strong performance of equity markets over the last 12 months has resulted in 11.9% growth in average funds under management on the March 2003 half with fee revenue increasing in all regions.

The March 2004 result includes the adverse impact of the recognition of a prior period tax underprovision of \$10 million.

The closing funds under management balance of \$76.7 billion was impacted by approximately \$1 billion of outflows resulting from the sale of National Australia Life in the UK, the National Australia Mortgage Fund and the closure of Your Prosperity during the March 2004 half.

Despite recent falls in market share, Wealth Management continues to be the number one provider of retail investment platforms in Australia with a market share of 18.8% and number two in retail funds under management with a market share of 13.1% as at 31 December 2003. Recent Australian retail market share performance includes the impact of initiatives to drive sustainable profit growth such as 'Transition to Advice' in the Bank channels.

Wholesale funds under management continues to grow with market share increasing to 7.0% to retain 4<sup>th</sup> ranking. The June 2003 and December 2002 net annual wholesale inflows market share reflects Wealth Management being one of the few fund managers in the market with positive inflows in those periods, illustrating the lumpy nature of the industry.

The cost to funds under management ratio for the Investments business\* achieved 58 basis points as a result of cost containment and increased funds under management. This compares with 67 basis points for the March 2003 half (2004 full year target - 65 basis points).

*\*Excluding costs of NAFIM investor compensation and enforceable undertakings and volume-related expenses.*

### **Insurance**

Profit from operations growth of 22.2% on the March 2003 half in the Insurance business represents a continuation of the solid result achieved in the September 2003 half. The retail risk insurance businesses benefited from growth in annual inforce insurance premiums, the result of stable sales and favourable lapse experience, the latter particularly in relation to lump sum business. Additionally, a continued focus on disability claims management has had a favourable impact.

This performance is supported through Wealth Management retaining the largest share of the Australian total retail life insurance market (excluding re-insurers) for both annual in-force premiums and new retail risk annual premiums. Wealth Management has continued to focus on writing quality business and enhancing product design to underpin long-term and sustainable profit growth.

The Insurance result also includes the favourable impact of an additional receipt of profit share commission income on the Creditor Insurance business in the UK relating to the 2003 year.

Robust cost containment together with continued growth in the Insurance business has resulted in a cost to premium income ratio for the March 2004 half of 19% compared with 21% for the March 2003 half (2004 full year target - 21%).

### **Private Bank**

The Private Bank continued to experience solid growth in underlying profit from operations due to increased deposit and lending volumes and strong revenue growth from its financial planners.

### **Other**

The continuation of significant expenditure on compliance activities and regulatory programs such as NAFIM investor compensation and enforceable undertakings, FSRA, superannuation and tax legislation changes in Australia and the UK has resulted in \$37 million adverse impact on profit from operations.

### **Strategic investment expenditure**

Strategic investment spend in both the Amazon program in Australia and the Endeavour program in the UK continued in the half year to March 2004 with the profit after tax impact being \$9 million and \$7 million respectively. The delivery of "Adviser Central" during 2004 is a key milestone for the Amazon program which provides advisers with tools to improve efficiencies in business processes, plan writing and client reviews to deliver a superior client experience.

### **Investment earnings on shareholders' retained profits and capital from life businesses**

Investment earnings generated on shareholders' invested capital in the life insurance statutory funds of the life businesses were \$44 million, a significant increase on March 2003 in line with the improved performance of major stockmarket indices. Shareholders' capital is invested in fixed interest and cash (75%) with the remaining balance in equities, consistent with the investment profile of policyholder assets and regional regulatory requirements.

## Valuation and Revaluation Profit

The valuation represents the market value of the subsidiaries of the parent life company, National Australia Financial Management (NAFiM). Included within Wealth Management operations, but excluded from the valuation are businesses such as National Australia Trustees, the Private Bank, and the results of NAFiM's own business. The valuation also excludes the value created from banking product sales through Wealth Management channels.

The valuation increased \$29 million (inclusive of a \$138 million dividend payment and \$111 million impact of transfer of franking credits, which decrease market value) from \$6,633 million at 30 September 2003 to \$6,662 million at 31 March 2004. Values shown are directors' market valuations. The valuations are based on Discounted Cash Flow (DCF) valuations prepared by Tillinghast – Towers Perrin (Tillinghast), using, for the Australian and New Zealand entities, risk discount rates specified by the directors. The components comprising the change in value are summarised below:

<b>NAFiM subsidiaries</b>					
<b>Market value summary (\$m)</b>	<b>Net assets</b>	<b>Value of inforce business</b>	<b>Embedd-ed value</b>	<b>Value of future new business</b>	<b>Market value</b>
<b>Market value at 30 September 2003</b>	<b>1,572</b>	<b>2,463</b>	<b>4,035</b>	<b>2,598</b>	<b>6,633</b>
Operating profits after tax of NAFiM subsidiaries	173	-	173	-	173

<b>- Tax consolidations – transfer of franking credits to National Group</b>	<b>-</b>	<b>(111)</b>	<b>(111)</b>	<b>-</b>	<b>(111)</b>
<b>Revaluation profit before tax</b>	<b>-</b>	<b>(164)</b>	<b>(164)</b>	<b>171</b>	<b>7</b>
<b>Foreign exchange excess movements</b>	<b>(3)</b>	<b>3</b>	<b>-</b>	<b>-</b>	<b>-</b>
<b>Market value at 31 March 2004</b>	<b>1,631</b>	<b>2,262</b>	<b>3,893</b>	<b>2,769</b>	<b>6,662</b>

### Revaluation Profit

The components comprising the revaluation profit are summarised below:

	<b>\$m</b>
Roll forward of DCF	186
Change in assumptions and experience	(68)
<b>Revaluation profit (pre tax consolidations) before tax</b>	<b>118</b>
Tax consolidations – transfer of tax credits to the National Group	(111)
<b>Revaluation profit before tax</b>	<b>7</b>
Income tax expense on revaluation profit	(9)
Income tax benefit arising from election into tax consolidations	150
<b>Revaluation profit after tax</b>	<b>148</b>
<b>Revaluation profit after tax – excluding the impact of tax consolidations<sup>(1)</sup></b>	<b>76</b>

<sup>(1)</sup> Revaluation profit after tax excluding the impact of tax consolidations is calculated by adjusting the revaluation profit before tax of \$7m by the after-tax impact of the loss of franking credits \$78 million (\$111 million x 70%), less the tax attributable to revaluation profits (\$9 million).

The \$7 million revaluation profit before tax reflects the positive year to date experience and the anticipated growth in the value of the business above current levels of operating profit (ie. the roll forward of the DCF), offset by the negative effects of passing franking credits to the National Group and assumption changes.

The assumption changes primarily comprised higher assumed long-term retail Investments discontinuance rates, particularly for allocated pension business, and lower assumed margins for wholesale business. This has been mitigated to some extent by the positive impact of strong investment earnings and continued robust expense control in the current year.

The underlying valuation of the international businesses, which are predominantly of an Insurance nature have improved in their local currency, however, they have been negatively impacted by the strengthening of the Australian dollar.

Included within the experience items is a movement of value from embedded value to value of new business, reflecting the refinement in modelling for certain smaller entities.

During the half, the National Group elected to consolidate for Australian income tax purposes (ie. entered the tax consolidations regime). This impacted revaluation profit in two ways:

- The business valuation (and revaluation profit before tax) was negatively impacted by the transfer of franking credits from NAFiM's subsidiaries, of \$111 million (\$38 million in relation to the current half and \$73 million in relation to prior periods). These franking credits remain available to the National Group and are now recognised in National Australia Bank Limited.
- The tax attributed to the revaluation profit has been positively impacted. This is due to the restatement of the tax cost base of the NAFiM subsidiaries, such that there would be a lower tax liability on any sale of these subsidiaries. Therefore the tax benefit of \$150 million reflects the reversal of a previously recognised deferred tax liability on prior period revaluations of the NAFiM subsidiaries.

Entities held within the mark to market environment include operations in Australia, Europe, New Zealand and Asia. Distribution of value by both region and business segment are summarised below:

<b>NAFiM subsidiaries Market value summary (\$m)</b>	<b>Net assets</b>	<b>Value of inforce business</b>	<b>Embedd -ed value</b>	<b>Value of future new business</b>	<b>At 31 Mar 04 Market value</b>	<b>At 30 Sep 03 Market value</b>
<b>By region</b>						
Australia	1,236	1,923	3,159	2,663	5,822	5,775
Europe	242	213	455	49	504	504
New Zealand	23	45	68	6	74	77
Asia	130	81	211	51	262	277
<b>Market value at 31 March 2004</b>	<b>1,631</b>	<b>2,262</b>	<b>3,893</b>	<b>2,769</b>	<b>6,662</b>	<b>6,633</b>
<b>By business segment</b>						
Investments	748	1,147	1,895	1,891	3,786	3,707
Insurance <sup>(1)</sup>	762	1,167	1,929	838	2,767	2,785
Other	121	(52)	69	40	109	141
<b>Market value at 31 March 2004</b>	<b>1,631</b>	<b>2,262</b>	<b>3,893</b>	<b>2,769</b>	<b>6,662</b>	<b>6,633</b>

<sup>(1)</sup> The reduction in the value of the Insurance business is primarily due to the sale of National Australia Life in the UK. The proceeds from sale are included in Other.

### Actuarial assumptions applied in the determination of market value

Actuarial assumptions applied in the determination of market values for significant Wealth Management businesses held within the mark to market environment are summarised as follows:

<b>Assumptions applied in the determination of market value<sup>(1)</sup></b>	<b>New business multiplier</b>	<b>March 2004</b>		<b>September 2003</b>		
		<b>Risk discount rate (%)</b>	<b>Franking credit assumptn (%)</b>	<b>New business multiplier</b>	<b>Risk discount rate (%)</b>	<b>Franking credit assumptn (%)</b>
Insurance	9.4	11.1	70	9.1	11.0	70
Investments	9.3	11.1-12.2	70	9.1	11.0 - 12.0	70
New Zealand	6.7	11.4-12.5	70	6.8	11.25 - 12.50	70
Hong Kong	9.0	12.5	-	9.0	12.5	-

<sup>(1)</sup> The bulk of the European valuation was performed on a consolidated basis. Where the European business valuations identified separate values of inforce business and future new business, approximating methods were used to derive the value of future business that did not involve new business multipliers. The risk discount rate used in European valuations at 31 March 2004 was 10%.

## OTHER (INCLUDING EXCESS CAPITAL, GROUP FUNDING & CORPORATE CENTRE)

### Performance Summary

By Division	Half year to			Fav/(unfav) change on	
	Mar 04 \$m	Sep 03 \$m	Mar 03 \$m	Sep 03 %	Mar 03 %
Excess Capital <sup>(1)</sup>	11	16	38	(31.3)	(71.1)
Group Funding	(64)	(34)	(32)	(38.2)	(46.9)
Corporate Centre	(64)	(36)	(29)	large	large
<b>Other <sup>(2)</sup></b>	<b>(117)</b>	<b>(54)</b>	<b>(23)</b>	large	large

<sup>(1)</sup> Net interest income from excess capital (after tax).

<sup>(2)</sup> Refer to Note 1 for a reconciliation of Other (including Excess Capital, Group Funding & Corporate Centre) to Group net profit.

### Excess Capital

The Group's earnings on excess capital for the March 2004 half were \$11 million compared with \$38 million in the prior corresponding period reflecting a lower volume of excess capital due to the impact of the share buy-back, offsetting the impact of the higher average earning rate.

Earnings on excess capital is calculated by applying the average three-year bank bill swap rate of 5.81% (September 2003: 4.93%, March 2003: 4.99%) to the estimated excess.

When estimating excess capital, benchmarks are chosen having regard to Australian and international peers and the risk profile and asset base of the Group's banking operations. Excess capital does not represent the total amount of surplus capital held by the Group.

### Group Funding

Group Funding acts as the central vehicle for movements of capital and structural funding to support the Group's operations. This minimises the earnings distortion to the operating divisions and enhances the comparability of divisional performance over time.

Group Funding experienced a loss of \$64 million compared to a loss of \$32 million for the March 2003 half. The main factors contributing to the movement include:

- the decision not to book the tax benefit on the interest expense relating to ExCaps following the receipt of an ATO tax assessment; and
- one-off items relating to fee income and taxation expense.

### Corporate Centre

Corporate Centre comprises the following non-operating units – Group and Corporate Finance, Corporate Development, People & Culture, Risk Management, Nautilus Insurance, Technology, Office of the CEO, and Group eliminations.

The Corporate Centre result for the half has primarily been impacted by:

- \$22 million (after tax) write off of development work associated with the Integrated Systems Implementation (ISI) program;
- growth in operating costs (including software amortisation) for the ISI program, which is the Group's strategic infrastructure program; and
- growth in costs associated with major Group-wide projects - Basel II and IFRS.

## RESULTS FOR THE HALF YEAR ENDED 31 MARCH 2004

### DETAILED FINANCIAL INFORMATION

The following section does not purport to be a set of financial statements. For the Group's financial statements refer to the Appendix 4D filed with the ASX.

## 4. AVERAGE BALANCE SHEET & RELATED INTEREST

The following tables set forth the major categories of interest earning assets and interest bearing liabilities, together with their respective interest rates earned or paid by the Group. Averages are predominantly daily averages. Interest income figures include interest income on non-accruing loans to the extent cash payments have been received. Amounts classified as Other International represent interest-earning assets or interest-bearing liabilities of the controlled entities and overseas branches, excluding Europe. Non-accrual loans are included with interest-earning assets within loans and advances.

### Average assets and interest income

<sup>(1)</sup> Includes non-accrual loans.

<sup>(2)</sup> Includes interest on derivatives and escrow deposits.

<sup>(3)</sup> The calculations for Australia, Europe and Other International include intragroup cross border loans/borrowings and associated interest.

<sup>(4)</sup> Included within investments relating to life insurance business are interest-earning debt securities. The interest earned from these securities is reported in life insurance income, and has therefore been treated as non-interest earning for the purposes of this note. The assets and liabilities held in the statutory funds of the Group's Australian life insurance business are subject to the restrictions of the Life Insurance Act 1995.

## 15. CAPITAL ADEQUACY

### Regulatory capital position

Under guidelines issued by APRA, life insurance and funds management activities are excluded from the calculation of risk-weighted assets, and the related controlled entities are deconsolidated for the purposes of calculating capital adequacy. The intangible component of the investment in these controlled entities (the difference between the appraisal value and the embedded value) is deducted from Tier 1 capital, and the embedded value is deducted from the total of eligible Tier 1 and Tier 2 capital. Additionally, any profits from these activities included in the Group's results are excluded from the determination of Tier 1 capital to the extent that they have not been remitted to the Company in the form of dividends. A reconciliation of capital under the different bases is provided.

	As at		
	Mar 04	Sep 03	Mar 03
	\$m	\$m	\$m
<b>Reconciliation to shareholders funds</b>

Deconsolidation of Wealth Management profits (net of dividends)	(535)	(290)	(125)
FITB (excluding FITB on the general provision for doubtful debts) <sup>(2)</sup>	-	(66)	(108)
Non - qualifying outside equity interest	(3,558)	(2,804)	(285)
<b>Tier 1 Capital</b>	<b>20,671</b>	<b>19,739</b>	<b>19,013</b>
Asset revaluation reserve	16	16	7
General provision for doubtful debts	1,254	1,248	1,323
Perpetual floating rate notes	329	367	414
Dated subordinated debts	5,268	5,390	4,666
Exchangeable capital units	1,262	1,262	1,262
Notional revaluation of investment securities to market	4	37	21
<b>Tier 2 Capital</b>	<b>8,133</b>	<b>8,320</b>	<b>7,693</b>
<b>Other deductions</b> <sup>(3)</sup>	<b>(2,922)</b>	<b>(3,591)</b>	<b>(3,393)</b>
<b>Total regulatory capital</b>	<b>25,882</b>	<b>24,468</b>	<b>23,313</b>
Risk-weighted assets - credit risk	255,051	248,308	250,703
Risk-weighted assets - market risk <sup>(4)</sup>	21,750	4,057	3,666
<b>Total risk-weighted assets</b>	<b>276,801</b>	<b>252,365</b>	<b>254,369</b>
<b>Risk adjusted capital ratios</b>			
Tier 1	7.47%	7.82%	7.47%
Tier 2	2.94%	3.30%	3.02%
Deductions	(1.06%)	(1.42%)	(1.33%)
<b>Total capital</b>	<b>9.35%</b>	<b>9.70%</b>	<b>9.16%</b>

<sup>(1)</sup> The estimated dividend of \$1,265 million for the March 2004 half year is accounted for in full at 31 March 2004 as Tier 1 capital as it is fully underwritten.

<sup>(2)</sup> APRA requires any excess FITB (excluding FITB impact on the general provision for doubtful debts) over the provision for deferred income tax liabilities be deducted from Tier 1 capital.

<sup>(3)</sup> Represents \$2,922 million investment in non-consolidated controlled entities, net of intangible component deducted from Tier 1 (Sep 03: \$2,959 million, Mar 03: \$2,948 million).

<sup>(4)</sup> The calculation to determine the market risk capital component of risk-weighted assets at 31 March 2004 was carried out on a best estimate basis under the Standard Method as directed by APRA. The difference of \$17,875 million in risk-weighted assets between the Standard Method calculation (\$21,750 million) and the Internal Model Method (\$3,875 million) that was used for prior period calculations, reflects the following:

- The Standard Method, as prescribed by the APRA Prudential Standard (APS 113), limits recognition of portfolio effects on outstanding positions and is substantially more restrictive on the rules regarding the matching of positions; and
- The limited time frame to implement the Standard Method impacting the ability to explore all position offsetting opportunities permitted by APS 113.

## 17. RISK MANAGEMENT

### Market risk

The management of market risk has been discussed in detail in the Group's annual financial report 2003, at Risk Management and Note 46 Derivative Financial Instruments. Please refer to that report for detailed information regarding the management of risk.

### Trading risk

The following table shows the Group's Value at Risk (VaR) for the Group's trading portfolios, including both physical and derivative positions. The figures reflect the potential losses across products and regions in which the Group operates.

Value at risk at 99% confidence level	Average value half year to		Minimum value half year to <sup>(1)</sup>		Maximum value half year to <sup>(1)</sup>	
	Mar 04	Sep 03	Mar 04	Sep 03	Mar 04	Sep 03
	\$m	\$m	\$m	\$m	\$m	\$m
Foreign exchange risk	11	8	1	2	39	20
Interest rate risk	15	14	9	9	21	22
Volatility risk	8	4	3	2	20	7
Commodities risk	1	1	1	-	2	1
Diversification benefit	(8)	(7)	n/a	n/a	n/a	n/a
<b>Total</b>	<b>27</b>	<b>20</b>	<b>12</b>	<b>14</b>	<b>55</b>	<b>28</b>

<sup>(1)</sup> Value at risk is measured individually according to foreign exchange risk, interest rate risk, volatility risk and commodities risk. The individual risk categories do not sum up to the total risk number due to portfolio effect. Risk limits are applied in these categories separately, and against the total risk position.

VaR measures the adverse changes in the trading portfolio value brought about by daily changes in market rates at a 99% confidence level.

### Balance sheet risk

#### a) Structural interest rate risk

This table presents a summary of the aggregated structural earnings at risk relating to non-trading assets and liabilities that are sensitive to changes in interest rates. Based on the structural interest rate risk position at balance date, the table shows the possible impact on net income for the 12 months ending September 30, 2004 under a rising or declining interest rate environment.

	Forecast effect on net income 2004 <sup>(1)</sup>		Forecast effect on net income 2003	
	Rising rates	Declining rates	Rising rates	Declining rates
	\$m	\$m	\$m	\$m
Australian dollars	39	(18)	67	(44)
Non-Australian dollars	(23)	12	21	(8)

<sup>(1)</sup> Represents the forecast effect on net interest income for the year ending September 30, 2004 and the prior year comparative.

#### b) Structural foreign exchange rate risk

Refer table below.

#### c) Liquidity risk

Refer to the Group's annual financial report 2003 at Risk Management for a detailed discussion of the management of these risks.

## Detailed Financial Information - Note 17: Risk Management

### Operational, credit & country risk

Refer to the Group's annual financial report 2003 at Risk Management for a detailed discussion of the management of these risks.

### Derivatives fair values

This table shows the fair value of all derivative instruments held or issued by the Group. It includes trading and other than trading contracts.

## NON-GAAP FINANCIAL MEASURES

### Cash earnings

Cash earnings is defined as follows:

#### Net profit

---

Less:

- Outside equity interest
- Distributions
- Revaluation profit/(loss) after tax

Add:

- Goodwill amortisation
- 

Cash earnings

---

Cash earnings is a key performance measure and financial target used by the Group. Dividends paid by the Company are based on after-tax cash earnings (adjusted for significant items).

Cash earnings is a key performance measure used by the investment community, as well as by those Australian peers of the Group with a similar business portfolio.

Cash earnings does not refer to, or in any way purport to represent the cash flows, funding or liquidity position of the Group. It does not refer to any amount represented on a Cash Flow Statement.

Adjustments are made between net profit and cash earnings as follows:

- Outside equity interest - this reflects the allocation of profit to minority interests in the Group, and is adjusted from net profit to reflect the amount of net profit that is attributable to ordinary shareholders
- Distributions – this reflects payments to holders of National Income Securities, Trust units and Trust Preferred Securities, and is adjusted from net profit to reflect the amount of net profit that is attributable to ordinary shareholders
- Revaluation profit/(loss) – relates to the movement in net market value (including the value of intangible assets) of investments in life insurance controlled entities recorded on the balance sheet in accordance with Australian Accounting Standards. As it relates to an intangible asset, management believes it is prudent to isolate this amount from the underlying operating result. It is separately identified and discussed in detail. Management further wish to separate this, as the method for accounting for the value of life insurance controlled entities is not comparable on an international basis.
- Goodwill amortisation - relates to the straight-line method of amortising goodwill (an intangible asset recorded on the balance sheet) in accordance with Australian Accounting Standards. Financial statement users generally do not regard goodwill amortisation expense as being useful information in analysing investments. As it relates to an intangible asset, management believes it is prudent to isolate this amount from the underlying operating result.

Cash earnings before significant items (and net profit before significant items)

Under Australian Accounting Standard AASB 1018(5.4) “when a revenue or an expense from ordinary activities is of such a size, nature or incidence that its disclosure is relevant in explaining the financial performance of the entity for the reporting period and its disclosure is not otherwise required by this or another Standard, its nature and amount must be disclosed separately either on the face of the statement of financial performance or in the notes in the financial report”.

The Group has identified such items as ‘significant items’ on its Performance Summaries.

Management believe that the inclusion of these items distorts the underlying operating results of the Group and cause difficulty in identifying underlying performance trends and issues. Through the clear separation and identification of these items the Group ensures that they are identified and discussed in full, as well as ensuring that the underlying performance is highlighted and discussed in full.

## Cost to income ratio

The cost to income ratio for the Banking divisions is calculated as total costs (defined in table below) divided by total income (defined in table below):

Total expenses

Less:

Interest expense

Life insurance expenses

Goodwill amortisation

Charge to provide for doubtful debts

Significant expenses

---

Total costs for purposes of cost to income ratio

---

Total revenue

Less:

Interest expense

Life insurance income

Significant revenue

---

Total income for purposes of cost to income ratio

---

The cost to income ratio calculated on this basis is a standard efficiency measure used widely across the Australian banking industry. In the above income calculation, National's does not include net life insurance income and the pre-tax equivalent gross up of certain structured finance transactions.

## Economic Value Added (EVA<sup>®</sup>)

EVA<sup>®</sup> is a measure designed to recognise the shareholder requirement to generate a satisfactory return on the economic capital invested in the business. If the business produces profit in excess of its cost of capital then value is being created for shareholders.

To align management's interests with those of shareholders, senior management is required to place a significant percentage of their total remuneration at risk, dependent upon performance against EVA<sup>®</sup> annual growth targets.

In order to encourage longer term management decision making and sustained value creation, the Group sets EVA<sup>®</sup> growth targets for 3 year periods.

## Sales (Wealth Management)

Includes sales for Retail and Corporate Investment products and Risk products. Investment product sales represent the initial application amount and any additional contributions made. Inflows into cash products and reinvestment of distributions are excluded. Risk sales represent first year annual premiums for new business, CPI increases and one-off increases in the sum insured.
